

Locally oriented content is the reason I have XM radio. Until now those local stations had you wrapped around their fingers with boring people behind the mike, play lists that never changed and weather conditions for 25 square miles. I spend a good part of my time in the car and the importance of road and weather news on XM helps me plan my trips, are the local stations going to tell me about traffic conditions or weather 300 miles away - no. Reject petition 04-160.
